EDUCATION

Kingston University

BSc (Hons.) Computer Science with Software Engineering - First Class

2022 – 2025

Richmond Upon Thames College

BTEC Level 3 National Diploma — Information Technology

2020 – 2022

EXPERIENCE

Senior Host

Feb 2026 – Jun 2026

Chessington World of Adventures

Part-Time

- Onboard and train new team members, maintaining high standards of customer service and operational performance across shifts.
- Assist in day-to-day team management, providing on-the-job coaching and support to colleagues throughout busy periods.

Retail Host

Mar 2024 – Dec 2024, Apr 2025 – Dec 2025

Chessington World of Adventures

Part-Time

- Worked closely with colleagues to ensure smooth store operations and a consistently positive customer experience.

Team Lead

May 2025 – Sep 2025

Kingston University

Summer Internship

- Led a 4-member team to design and deliver a seat planning web application and managing task assignments.
- Coordinated sprint planning, tracked milestones using agile methodologies, and mentored junior team members throughout the project.

Junior Software Developer

May 2024 – Sep 2024

CSE Connect

Summer Internship

- Collaborated with developers and stakeholders to define scope and requirements for an internal contribution tracking tool.
- Designed and built a prototype Task Contribution Logging System, writing clean, well-documented code throughout the development life cycle.

Academic Mentor

Sep 2023 – May 2025

Kingston University

Part-Time

- Ran weekly programming workshops supporting students in understanding and applying core programming fundamentals.

PROJECTS

Sprint Sync — Project Management Platform | *React.js, Material UI, RESTful APIs*

- Built a full-stack project management platform as my Final Year Project, featuring role-based access control (Admin, Leader, Contributor, Viewer), sprint tracking, and real-time team engagement analytics.
- Implemented React 18.3.1 with Material-UI for a responsive, multi-role UI with protected routing and authentication flows.
- Designed a RESTful API architecture handling user projects, sprint logs, attendance tracking, and task completion monitoring across distributed teams.

StaySafe — Personal Safety Tracker | *React Native, Expo, Google Maps API, Geolocation*

- Built a cross-platform mobile app (React Native / Expo) with real-time location tracking, live positioning, and route visualisation via Google Maps API and device geolocation services.

Personal Book Management System | *Kotlin, Jetpack Compose, Room Database, Android Jetpack*

- Developed a Kotlin/Jetpack Compose Android app with full CRUD operations via Room Database, ViewModel/LiveData integration, and a mobile-first UI featuring search, genre/progress sorting, and email export.
